PROFIL

PT. CTECH ERP INDONESIA

Dr. Ir. Agung Terminanto, MBA, IPM, CEA, CEL
Founder & CEO PT. Ctech ERP Indonesia

PT. Ctech ERP Indonesia adalah perusahaan yang bergerak di bidang jasa Konsultan Implementasi Enterprise Resource Planning (ERP / Perencanaan Sumber Daya Perusahaan yang terintegrasi) dengan perangkat lunak open source Odoo secara Cloud Computing dan Digital Business Transformation, didirikan pada tahun 2022 oleh **Dr. Ir. Agung Terminanto, MBA, IPM, CEA, CEL**, seorang Profesional Odoo Specialist bergelar akademis (lulusan S-3) Doctor ilmu ERP Odoo, yang berpengalaman sebagai praktisi sekaligus dosen pengajar aktif berdedikasi tinggi di beberapa Universitas terkemuka.

PT. Ctech ERP Indonesia juga bertekad mengembangkan ketertarikan generasi muda pada bidang Teknologi dan Informasi, berkontribusi dalam menyiapkan Sumber Daya Manusia (SDM) unggul yang kompeten mengolah industri di negeri sendiri melalui penanganan bidang ERP, agar generasi muda Indonesia siap terjun memenuhi kebutuhan industri dan lapangan kerja dalam negeri (nasional), serta mampu bersaing di lingkup internasional. Khusus untuk mewujudkan tekad ini maka PT. Ctech ERP Indonesia melahirkan unit kerja **CTECH ERP ACADEMY**. Pada tahun 2024 **PT. Ctech ERP Indonesia** resmi menjadi **Partner Odoo Internasional**.

This 4th industrial revolution is in motion!

Nine Technologies Are Transforming Industrial Production

Industry 4.0 is the vision of the industrial production of the future

VUCA	BANI	RUPT	TUNA
Volatile	Brittle	Rapid	Turbulent
Uncertain	Anxious	Unpredictable	Uncertain
Complex	Non-Linear	Paradoxical	Novel
Ambiguous	Incomprehensible	Tangled	Ambiguous

ERP

BENEFIT ERP

Why no ERP ?

Problems Identification - Purchase

Based On the observations, four major within the **Procurement** business process need to be solved

Problems Identification

1. Tidak terstandarisasi Bisnis Proses Pengadaan
2. Pembuatan Dokumen PR dan PO masih manual
3. Persiapan data yang lama untuk Lead Time
4. Pembayaran telat ke Vendor, sehingga menyebabkan perselisihan

Problems Identification - Marketing

Based On the observations, three major within the **Marketing** business process need to be solved

Marketing

Customer Order

Marketing Order

Inventory

Logistik

Logistik Inventory Control

Check Stock

Data Analytics

Stock Opname

Production

Process Product with Work Station

QC Packaging

Delivery Order

Customer

Check Product

Handover Product

Receive Product

Receive Bill

Payment

Problems Identification

1. Pencatatan Stock dan Alur perpindahan barang, User tidak mengetahui dengan spesifikasi barang tersebut berada dimana.
2. Permintaan barang dari pihak produksi kepada pihak gudang secara pencatatan manual.
3. Salah perhitungan peramalan Production, karena Human Error
4. Proses Stock Opname yang Wasting Time, Karena Product diidentifikasi terlalu banyak dan pencatatan manual sehingga sulit menghitung Over dan Short

Problems Identification

1. Pencatatan Stock dan Alur perpindahan barang, User tidak mengetahui dengan spesifikasi barang tersebut berada dimana.
2. Permintaan barang dari pihak produksi kepada pihak gudang secara pencatatan manual.
3. Salah perhitungan peramalan Production, karena Human Error
4. Proses Stock Opname yang Wasting Time, Karena Product diidentifikasi terlalu banyak dan pencatatan manual sehingga sulit menghitung Over dan Short

Critical Success Factor Implementation ERP

Critical Success Factors	Frequency of CSF found in literature
1. Top Management commitment and Support	14
2. Business Process Reengineering	14
3. Use of Project management to manage implementation	13
4. Change Management Culture & Program	13
5. Clear Goals, focus and scope (Business Plan and Vision)	11
6. Selecting the right team (competence)	10
7. Avoidance customization	10
8. Project Champion	9
9. User Training and Education	9
10. Effective Communication	9
11. Use of ERP's consultants	8
12. Vendor package selection	6
13. User participation	5
14. Technical and business knowledge	5
15. Integration of the system	5
16. Appropriate Management expectation	4
17. Appropriate Business & IT Legacy Systems	3
18. Software Development, Testing & Troubleshooting	3
19. Vendor Partnership	3
20. Use of vendors' development tools	3
21. Monitoring & Evaluation of Performance	2
22. Management Structure	2
23. Interdepartmental cooperation and communication	2

Table 1: CSFs Found in Literature Review

Critical Success Factor Implementation ERP

Author	Organization	Industry	Implementation Scope	Why Failure?
(Okolica, 2001)	Hershey Foods Corporation	Candy	SAP \$110 million	Integration of the two systems had not been tested adequately
(Okolica, 2001)	Whirlpool Corp	Home Appliances	SAP	Delay shipments of appliances to distributors and retailers. One major problem of Whirlpool is the coordination of technical and business expertise. Whirlpool ignored the cautionary advice from the consultant and chose to go live.
(Scott, 1999)	FoxMeyer Drugs	Distributor of Pharmaceuticals	SAP/ R3 \$500 million	Excess Shipment resulting from incorrect order and costing the company millions of dollars. The company failed because of inadequate risk management and change management, lack of knowledgeable personnel, BPR and training and re-skilling for the employees and lack of clear goal focus and scope of the project.
(Nielsen, 2002)	UNSW	Higher Education Sector - Australia	PeopleSoft	Cost over runs. It was expensive for the university to take people out of normal positions.
(SMU 2001)	SMU	Higher Education Section - USA	PeopleSoft	Over budget because of unexpected costs that had not been budgeted for. 20 million (AUS) reportedly over budget (40 million total). First university to implement all three modules of PeopleSoft in Australia. Staff not happy with the benefits of the systems v. the cost.

Critical Success Factor Implementation ERP

Author	Organisation	Industry	Implementation scope	Why success?
(Davenport 2000)	Earth grains	Bakery Products (USA)	SAP's R/3	The project started with the clear strategy and each department had analyst reporting issues to management Change compensation system to employees after implementation. Involved interpersonal skills for training and strong knowledge on technical and the company business process.
Sumner (1999)	Monsanto	Chemical and life Sciences SAP		Success factors in Mpsanto project dealt with the management structure, the redesign of business process, and investment in re-skilling by proving training, and acquisition of external expertise.
(Grygo 2000) (Diehl 2000)	U.S. Mint	Coin Production	PeopleSoft - \$40 million	The project started with a business requirement. Employers were able to see how everything needed to be coordinated. People received training in the use of the system and used of external consultant on the project. The Project also involved Senior management and Organisations understand that the undertaken project will be painful and expensive but expected to provide savings of \$80 million over the next seven years.

The chart illustrates the trade-off between Product Scope and Flexibility for various ERP systems. Group A (high Product Scope, low Flexibility) includes SAP, Oracle, Sage, and Microsoft. Group B (low Product Scope, high Flexibility) includes Odoo, PLEX Systems, Salesforce, Zoho, and Workday. Other systems like Epicor, Infor, Openbravo, XTuple, and Cegid are positioned in the middle. A large purple arrow points from Group A towards Group B.
